

# ARDEX A 38™ Rapid Set Screed

Precision-engineered, polymer-modified, cement screed that sets, hardens and dries rapidly. After only 1 day, the compressive strength and tensile strength exceed those that regular cement screeds achieve after 28 days.

- Rapid hardening; install tile and natural stone in just 4 hours!
- Suitable for bonded, unbonded or floating screeds
- Interior or exterior applications, including pools and wet areas

For complete technical documentation, please see the Technical Data Sheet at [www.ardexamericas.com](http://www.ardexamericas.com)
