

MANUAL INSTRUCTION and PARTS LIST

Manual Part. number 3209281-R03 - 04/2002	
Machine serial N°	Write in the serial n° of yuor machine here

Thank-you for purchasing a Workman 350 II from an Imer U.S.A. dealer. <u>Your decision is an</u> intelligent one.

There is no other concrete mixer in the world which delivers the benefits and features of the Workman 350 II.

- Extremely rigid, mig welded bar steel frame.
- 5.5 H.P. Honda with low oil alert.
- Full width fenders.
- Torsion Bar suspension.
- Advance drum and paddle design, excellent mixing and discharge action.
- Telescopic foot stands which provide additional stability during operation.

At Imer U.S.A. we continually search for ways to better serve our customers. Should you have an idea or thought to share with us regarding this product we would appreciate hearing from you. Our motto is <u>"Tools and Services for the 21st Century"</u>. We look forward to delivering the goods.

Thank you again for your purchase.

Mace T. Coleman, Jr. President, Imer U.S.A., Inc.

Table of Contents

IMER U.S.A., INC. WORKMAN 350 II MULTIMIXER INSTRUCTION MANUAL

<u>NOTE:</u> Please read this manual before beginning to assemble or operate this piece of equipment.

ASSEMBLY	4
IMPORTANT NOTES AND ADVICE	5
OPERATING INSTRUCTIONS	7
MAINTENANCE	8
BASIC TROUBLE SHOOTING - TECHNICAL SPECIFICATIONS	10
SPARE PARTS	11

Essentially the Workman 350 II is fully assembled and ready to operate when it leaves the assembly facility here at Imer U.S.A. However, there are a couple items which should always be checked before towing the Workman 350 II.

- 1. Make sure each tire is inflated to 50 PSI (cold), and check the oil level of the Honda motor.
- 2. Make certain the retractable stability legs are raised up fully and locked in place with the anchor pin provided.
- 3. Make certain that the tow bar is properly anchored and its tow chain is in place. It is also important to loop the tow chain around the tow bar several times before connecting it to a vehicle.
- 4. Make sure the engine canopy door is latched shut.
- 5. Make certain that the hitch system on your car or truck is compatible to the tow bar tongue.
- 6. Finally, local laws and ordinances vary from state to state regarding the registration of towable construction equipment, check and see if a license plate is required. Call your local Department of Motor Vehicles for the proper procedure to follow.

NOTE State law may also require a tail light assembly.

Check with your local Department of Motor Vehicles for the proper procedure to follow.

IMPORTANT NOTES AND ADVICE

Do's and Don'ts on the Safe Use of the Workman 350 II

In the interest of safety, whoever uses the Workman 350 II should first read this manual and become familiar with all of the important safety notes. Failure to follow this advice may result in injury to yourself and others.

WHAT TO DO !

- Carefully read and understand these instructions before operating the mixer. Read the Honda manual too.
- Always turn off the engine and disconnect the spark plug wire before cleaning or maintaining the mixer. Mixers powered by electric motors should be unplugged from their power source before servicing is performed.
- Make sure the safety guards are always in place.
- When using the machine always wear safety boots with reinforced toe-caps, safety glasses, gloves, hard hat, and clothing with the appropriate fit. Loose clothing can cause injury should it become entangled with the mixer.
- Practice starting and stopping the machine.
- Keep the mixer clean and free of debris build-up.
- Periodically inspect your mixer for abnormal wear or damage.
- Always stop the engine before adding fuel.
- Do not operate the mixer while under the influence of drugs or alcohol.
- Always operate the mixer on a level surface.
- When loading the Workman it is the best to pour your bagged material into a 5 gallon bucket then pour it into the drum.
- It is much easier on your body and safer too to load the drum in this manner.

IMPORTANT NOTES AND ADVICE WHAT NOT TO DO !

DO NOT

Place your hands or any other object inside the mixer drum while it is running.

DO NOT

Place any tools or other objects in or around the mixer drum while it is running .

DO NOT

Operate the mixer on a surface that is UNEVEN.... if the Workman is placed on an incline, it can fall over or roll away.

DO NOT

Clean, assemble or work on the mixer while it is plugged in !

DO NOT

Operate the mixer in or around water puddles !

DO NOT

Leave the mixer unattended !

DO NOT

Allow other persons around the mixer while it is operating

DO NOT

Operate the Workman II 350 if you are uncertain as to how to run the machine.... Contact your local Imer Distributor or call Imer U.S.A. at 800 - 275 - 5463

DO NOT

Operate the mixer while under the influence of drugs or alcohol !

WE WANT SAFE AND EFFICIENT PRODUCTION/OPERATION FOR ALL OUR CUSTOMERS !

OPERATING INSTRUCTIONS

- 1. Before starting the engine read the Honda manual provided and become familiar with the GX160 powerplant. Especially important is to check the oil level daily and change it monthly. Additionally, cleaning the air filter weekly ensures consistently good performance.
- 2. Operate the Workman II 350 on a level surface. For additional stability the telescopic foot stands can be lowered and locked into place.
- 3. To put the drum in the loading position rotate the dump wheel until the desired drum position is achieved.
- 4. Start the engine and set the throttle at 3/4 to full on.
- 5. Now add 1/2 of the water which will be required and then begin to add the cement and aggregates. Additional water can be added as the cement and aggregates mix together.

BE CAREFUL ! Do Not put your shovel or your hands inside the drum !

- 6. To put the drum in the discharge position rotate the dump wheel untill the desired drum position is achieved.
- 7. During the loading, mixing, and discharge cycle it is important to keep the mixer running at all times.
- 8. Always prepare your work site to have a level ground surface, the Mixer must be stable as you load and discharge the drum.

MAINTENANCE

Lubrication

- 1. All the other components on the mixer which engage or move back and forth should be lubricated with a light aerosol type lubricant on a weekly basis. WD- 40 works well for this application.
- 2. Essentially the gearbox is sealed for life. The quality of the gears and the lubricant are such that changing the oil is not necessary. If you want to change the oil, see your dealer or call IMER U.S.A directly for instruction.
- 3. One a year remove the cast cap from the top half of the dump gear assembly and grease it up good. (Part # 36, page 12)

<u>Belt Tension</u>

1. The mixer has two belts: one in the canopy and the other in the arm. The belts are properly adjusted before leaving our factory, however, it is a good idea to check their tension before operating the mixer. Then, when one belt becomes loose, tighten it back to this original condition.

The belts will stretch the most during the first few hours of operation check them frequently, and always kill the motor and disconnect the spark plug wire before touching the belts. Or, if your machine has an electric motor, unplug it from the power source before adjusting the behs.

- 2. To tighten the belt inside the canopy loosen the bolts which anchor the motor mount plate to the mixer frame. This allows the motor mount plate to slide down the frame, which in turn tightens the belt. The belt should have 1/4" to 3/8" of play. Now re-tighten the bolts which anchor the motor mount plate.
- 3. To tighten the belt inside the arm loosen the 4 nuts which anchor the gearbox on the arm. Tighten the belt by turning the adjustment bolt. The belt should have 1/4" to 3/8" of play, do not over tighten as this shortens their drive life. Now re-tighten the gearbox anchor bolts.

<u> № NOTE</u>

It is very important to keep the engine pulley and the drive pulley in line with one another. Failure to maintain this alignment will cause the belt to twist and then break.

MISC. Every month check all the mixer's mounting hardware to ensure all the nuts and bolts are properly tightened.

Wheel Bearings

1. The wheel bearings should be cleaned and repacked every 6 months to 1 year. The interval being dependant upon the amount of time the machine is towed, and under what conditions. This maintenance procedure is the same as that for automotive wheel bearings.

<u>Engine</u>

Read the Honda manual carefully ... and follow their instructions. Changing the oil and cleaning the air filter frequently ensure a reliable and long lasting motor. When you may need Honda Engine Service or Warranty Assistance, take the machine to your local Honda power equipment dealer, they will honor the warranty throughout America.

It is always a good idea to check the oil level in the engine crankcase at the start of each working day. Clean oil at the correct level makes for a engine that will last and last.

Mixer's drum disassembly and re-assembly

In case it's necessary to remove the drum, to reset it it's necessary.

- to clean carefully the gear shaft cone and the drum cone.
- to place the drum on the shaft cone, making sure that shaft shear pin is inside its seat in the drum cone.
- to block drum tighting screw with washer by following tighting torques:

Workman 350 II: 300 ± 20 Nm.

TECHNICAL SPECIFICATIONS WORKMAN II 350

Drum capacity	12.5 CU. FT.		
Batch Output	9.5 CU. FT. (1.5 bag)* 1/3 of a cubic yard		
Drum Diameter	32.5 Inches		
Discharge Outlet Height	26.5 Inches		
Pneumatic Wheels	4.50-10 Inches (50 PSI)		
Power plants	5.5 HP Honda GX160 2.0 HP electric		
Overall Operating Dimensions	79" x 50" x 66"		
Overall Storage Dimensions	79" x 50" x 66"		
Weight	545 LBS (248 Kg)		

*Capacity based upon usable volume

Due to Imer U.S.A. 's commitment to Reasearch and Development, specifications are subject to change without notice.

EQUIPMENT WARRANTY

IMER U.S.A. INC.

207 Lawrence avenue So. San francisco, CA 94080 Tel.(650) 872-2200 Fax(650) 873-6482

We warrant to the original purchaser that the IMER equipment described herein (the "equipment") shall be free from defects in material and workmanship under normal use and service for which it was intended for period of one (1) year from the date of purchase by the original purchaser.

Our obligation under this warranty is expressly limited to replacing or repairing, free of charge, F. O.B. our designated service facility, such part of the equipment as our inspection shall disclose to be defective. Parts such as engines, motors, pumps, valves, electric motors, etc. furnished by us, but not manufactured by us, will carry only the warranty of the manufacturer. Transportation charges or duties shall be borne by purchaser. This shall be the limit of our liability with respect to the quality of the equipment.

This warranty shall not apply to any equipment, or parts thereof, which has been damaged by reason of accident, negligence, unreasonable use, faulty repairs, or which has not been maintained and operated in accordance with our printed instructions for the equipment. Further, this warranty is void if the equipment, or any of its components, is altered or modified in any way.

THIS WARRANTY IS EXPRESSLY IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

We make no other warranty, representation or guarantee, nor is anyone authorized to make one on our behalf. We shall not be liable for consequential damage of any kind, including loss or damage resulting, directly or indirectly, from the use or loss of use of the machine. Without limiting the generality of the foregoing, this exclusion from liability embraces the purchaser's expenses for downtime, damages for which the purchaser may be liable to other person, damages to property, and injury or death of any persons.

This warranty shall not be deemed to cover maintenance parts, including but not limited to blades, belts, hoses, hydraulic oil, or filters, for which we shall have no responsability or liability whatsoever.
